WORK EXPERIENCE

Research Assistant

Chemical Eng, Dpt, Queen's University, (2011-2013)

Developed a novel polymer-based technology that improved degradation rate of contaminants in water by 98% compared to other conventional strategies. My work resulted in two publications at reconized journals:

- J. Hazard. Mater., 254-255: 206-213 (2013)
- J. Chem. Technol. Biotechnol., 89: 88-96 (2014)

Field Supervisor

Sivensa, Caracas, Venezuela (Jun 2010 - Dec 2010)

Oversaw the processing of 130 t/day of scrap metal from supply to delivery and proposed process improvements. Led and coordinated a team of 8 workers.
